<b>Diana Anghelache, Silviu Nastac</b> – Advances on Noise and Vibration Protection at Technological Equipments	7
<b>Igor Babiak, Anna Danihelová, Martin Čulík</b> – Excitation Frequency By Impulse Method And Tuning The Xylophone Bars	8
<b>Martin Čulík</b> – Influence of Spruce Wood and Bracing Construction on the Tone Quality of Acoustical Guitars Top Plates	9
<b>Martin Čulík</b> – Black Elder Wood for the Slovak Folk Wind Musical Instruments Making	10
<b>Miroslav Danihel</b> – Glued Connection Properties and Evaluation on Acoustical Quality of Musical Instruments	11
<b>Anna Danihelová</b> – Wood Characteristics and Acoustics Quality of Musical Instruments	12
<b>Anna Danihelová, Rastislav Klačanský, Stanislav Košúth, Miroslav Němec</b> – Design of Omni Directional Sound Source	13
<b>Anna Danihelová, Ivan Makovíny, Stanislav Košúth</b> – Elastic Characteristics of Wood Composite Materials	14
<b>Radoslav Darula, Stanislav Žiaran</b> – On Oil Viscosity Influence of Vibro–Acoustic Signal Strength	15
<b>Marián Flimel</b> – Problematic of Acoustics Warning Signals Accidental Influence in Exterior Environment	16
<b>Julius T. Fricke, Hans–Elias de Bree, André Siegel, Hans–Peter Schade</b> – Source Localization with Acoustic Vector Sensors	17
<b>R.N. Galimov, V.G. Makaryan, N.E. Molevich, D.P. Porfiriev, D.I. Zavershinsky</b> – Acoustical Perturbations in Media With EXOTHERMIC Chemical Reactions	18
<b>Vladimír Hájek</b> – Using LAN–XI for Sound and Vibration Measurements	19
<b>Hunyadi Dora</b> – Traffic Noise Annoyance in Budapest, Hungary	20
<b>Karel Irmann</b> – Logarithmic Presentation of Musical Interval in Bach’s tuning	21
<b>Martin Jedovnický, Monika Rychtáriková, Gerrit Vermeir</b> – Determination of the Context Related Sound Level in an Urban Public Place by Using a Sound–Masking Procedure	22
<b>Peter Kičák</b> – Frequency and Dynamics Analysis of Bass Tone of Cajon Box Drum	23
<b>Miroslav Němec</b> – Experiments in Education of Acoustics	24
<b>M. Nouby, K. Srinivasan</b> – Finite Element Analysis of Disc Brake Squeal Suppression Approach	25

<b>Michal Pec, Pawel Strumillo</b> – Principal Component Analysis for Head–Related Transfer Function Low–Order Filter Design	26
<b>Ana Picu</b> – An Investigation on the Human Sensation Induced by Wheel Hand Arm Vibration and Seat Whole–body Vibration using Single Axis and Triaxial Methods – A Study using the Steven’s Power Law	27
<b>Ana Picu, Silviu Nastac</b> – Advanced Simulations of Human Protective Devices Against Technological Vibrations	28
<b>Vitor Rosão, Eusébio Conceição, Lucia Házyóvá</b> – Method to Determine the Speed of Vehicles by Means of Noise Levels Variation	29
<b>Robert Ruiz, Philippe Plantin De Hugues, Claude Legros</b> – Voice Analysis as a Significant Parameter of Car Driver’s Fatigue	30
<b>Monika Rychtáriková, Gerrit Vermeir</b> – Room Acoustical Simulations for Experiments on Front–Back Localization of Sound Sources	31
<b>Konca Saher, Noel Hill</b> – Key Issues in the Design OF EDUCATIONAL Buildings	32
<b>Bart Sarens, Osamu Matsuda, Jozefien Goossens, Loic Martinez, Christ Glorieux</b> – Non–Destructive Testing of Materials by Linear and Nonlinear Acoustic Method	33
<b>Anatoli Stulov, Dmitri Kartofelev</b> – Piano Hammer–String Interaction: the Influence of the Elastic Parameters of Bass Hammers on the Contact Time Duration	34
<b>Ján Svoreň, Lukáš Murín</b> – The Effect of The Shape of The Compensating Slots in The Body of a Circular Saw Blade on Noise Level of a Circular Saws in the Cutting Process	35
<b>Peter Tomašovič, Dušan Dlhý</b> – Nepriezvučnosť Obvodovej Konštrukcie pri Alternatívnom Riešení Transparentných Prvkov	37
<b>Roman Trojanowski, Jerzy Wiciak</b> – Plate Vibration Control Using Piezoelectric Transducers And The LabView Software	38
<b>Jozef Zajac, Daniel Szabó</b> – Stavebné Meranie Vzduchovej Nepriezvučnosti Stropnej Konštrukcie	39
<b>Gennadi Zaslavski</b> – Discrimination of The Temporal Order of Brief Tone Pulses with Different Carrier Frequencies by a Bottlenose Dolphin	40
<b>Stanislav Žiaran</b> – Transmission of the Low Frequency Noise from Boilers–Rooms to Residence	41
